

DESCRIPCIÓN Luz de Seguridad Portátil

Luz		18 LEDs
Color		Rojo, Blanco, Azul, Amarillo, Verde, naranja Infrarrojo
Luminosidad (depende del color)		> 800 lumens (varía según modelo), visibilidad >8 Km
Medidas (cm)		6.98W x 4.76L x 2.54H
Peso		3.25oz; 92.4g
Batería	Tipo	Batería de Polímero de Litio
	Capacidad	1400 mAh / 5.18 Wh
	Tiempo de carga	< 1.5 horas
	Voltage Nominal	3.7V
	Certificación	UN38.3
	Autonomía (por carga)	Varía según ajuste de luminosidad y modo. 2 – 150 horas
	Vida de la Batería	1500 – 3000 ciclos
Potencia	Voltage de carga	5V vía conector Type-C
	Consumo (W)	Normal I/P Voltage DC 3.7V
Casing	Material	Polycarbonato, ABS, Caucho
	Nivel IP	IP68
	Grado de protecc antiexplosión	UL 746B, UL94
Soporte		Imanes de neodimio, Hierro, boro, grado NB42
Ambiente	Temp & Humedad de uso	-40 °C - +110 °C
	Temp & Humedad de almacenaje	20 – 28 °C

Top Light

Stay visible from up to 5 miles away from the ground or air using the ultra bright top white LED (activated via GA button), which is included on all devices - optional IR Hybrid models feature a 850 nanometer IR LED.

4 Brightness Setting

Depending on your situation, you have the option to use high brightness for maximum visibility, or low brightness to extend battery life. Either way you have the flexibility to choose which setting is appropriate based on the task at hand.

To change:

- o 1st Press = Low
- o 2nd Press = Medium
- o 3rd Press = High
- o 4th Press = MAX

Independent Rear LEDs

Easily toggle through settings (one or two push).

360° Light Visibility

Be seen up to 5 miles away with 18 high-powered LEDs. All devices come equipped with independ front/side & rear/side controls, 4 brightness settings & hands-free lighting functionality.

LED Device Colors

Hands-free Wearable Light

Using the high-powered front LEDs, the Guardian Angel Elite series device functions as a hands-free wearable light allowing you to keep your hands free and focus on the task at hand.

Independent Front LEDs

Easily toggle through settings (one or two push).

Work Light

Work light / Standard Operating Mode (hold down work light for 1 second to turn all Front LEDs on and all Rear LEDs flashing)

Low Light Red Work Light

In some cases a low light option is necessary, which is what the low light red work light is for. This feature provides hands free visibility while not compromising your night vision.

Emergency Mode

GA button activates high-visibility mode, illuminating all LEDs (strobe) including the top LED for maximum visibility.

- o 1st Press = All LEDs Blinking
- o 2nd Press = Off
