

## Description of product

The product to be assessed „Energy absorber / Energy absorber with lanyard, type AB, der. variation ABL, ABY“ is a special-purpose safety element of fall arrest system designed to dissipate the kinetic energy developed during fall from a height. The product is designed as individual energy absorber (type AB) or it is integrated with lanyard fitted with length adjuster (type ABL) or with two lanyards with length adjusters (type ABY). The product is a link between rigid attachment point and full body harness but not between rigid attachment point and work positioning belt. The product is made from synthetic fibres. Both ends are terminated by sewn eye. The product guarantees full ability to arrest user's fall from height or into depth. The product is not reusable after fall arresting.
